IT IS A MODERN AND STYLISH, PERFORMANCE CAT DESIGNED FOR PRE-TEENS AND YOUNG-TEENS TO GET SAILING AS EARLY AS POSSIBLE.

BRIEF SPECIFICATION
Length 3.65m
Beam 1.78m

CREW
One child
Two children
Child & adult

TRAPEZE
Single trapeze

TRILAM CONSTRUCTION

CAR TOPPABLE
Lightweight

"Great news for sailing schools, clubs, holiday companies and the young sailors who will always want to be on the water in this great little performer"

PLEASE TURN OVER FOR MORE INFORMATION

Catamarans provide young children with a great introduction to sailing. They can learn quickly to sail while looking cool on a tremendously stable and with plenty of space to have fun on the trampoline. The high volume hull is equally at home with one or two junior sailors, or an instructor with a crew.

Learning to sail in a fast and fun catamaran offers an exciting and appealing pathway for a young sailor. And the Topaz 12 oozes quality. The pedigree of the Loday/White design team is clearly evident. The 12 is very well thought out with loads of clever features. The combination of just the right level of simplicity with an extremely high specification all adds up to make the boat supremely user friendly.

The Topaz Cat 12 comes with an easily handled reefing mainsail and jib. The Dacron mainsail is radial cut to optimise performance with control. There is the luxury of a trapeze for the crew and it is easy to get up and out on the wire because of the unique Topaz Cat non-slip surface. The 12 tacks easily and provides perfectly behaved controllable performance. And an asymmetric spinnaker provides a power-boost switch which adds yet another level of excitement and progression.

The Topaz 12 rigging is very simple and straightforward. Non-stretch halyards are cleated at the base of the mast with no need for a fiddly masthead locking system. Halyards can be tucked away neatly in a bag next to the all-important righting line, ensuring the trampoline is uncluttered and easy for the crew to move around.

The Topaz 12 comes with fully adjustable rudder system. The kind of kit that you would only normally find on expensive top of the range racing catamaran. However, the blades are injection moulded plastic so they are very tough and durable which is just what is required on a teaching catamaran.

Safety features include a fully sealed mast to ensure that should the 12 be capsized it will float on its side rather than inverting. Righting lines and weight placed aft on the hull means righting the boat is effortless even for very lightweight crew.

The Topaz Cat 12 is tough, light and stiff with a totally modern design that combines high volume bows with a high-aspect rig, helping to make the 12 the real deal on the water. The durable and robust hull construction and the highest specification equipment throughout as standard make the Cat 12 a pleasure to sail and keeps gear failure to a minimum.
